DVDAttache is a cross-platform Java-based application that can be used to maintain a list of your favorite movies. It's easy to use and saves information on your movies in a simple, user-friendly database. The main window displays all the data about your movies. You can add new entries, browse the list of movies on the web and select a single movie or a batch of movies at a time. Alternatively, you can enter your favorite movie information directly into the application, such as plot, director, rating, duration, runtime, disc info and genres. The main window has a well-organised layout. You can quickly create a new movie and then select a couple of other details, such as the genre, rating, runtime, disc info, location, number of discs, or add images of the DVD case, posters, or even video trailers. More detailed information can be added when it comes to the cast, plot, DVD extras and the directors and writers. Once the movie details have been added, you can select a number of the main categories on which to base your categories. You can, for example, select the director and genre. Then you can browse the categories on the web and search for new movies. Additionally, it is possible to edit the filters and the genres list, update Easter Eggs, create a wishlist, search for movies on Amazon and update awards lists. You can also use it to manage the return and borrowing of DVDs. We haven't come across any issues in our evaluation. **DETAILS** The main window has two areas on the left-hand side. You can add new movie information in the first area or select a movie from the second area. If you select a movie from the second area, you can add the information about the movie to the first area. To browse the list of movies on the web, you can enter the name of a movie or select it from the list. When you add a new movie, you can choose from the genres and the directors list or select the default genres. More detailed information about the genre and the director can be added when you add a new movie. The release date is automatically inserted by the application. More information about the plot, runtime, disc info and locations can be added when adding a new movie. The images of the DVD case, DVD cover, and the posters can be added. The audio data and the video trailer can

What's New in the DVDAttache?

DVDAttache is a Java-based tool that you can use to manage a DVD video collection in a user-friendly database. You can use it to keep track of your favorite movies, as well as to create wishlists. The interface of the program is made from a standard window with a well-organized layout. You can quickly add a movie to the collection by selecting it from a long list of popular DVDs. Alternatively, you can fill the entries with numerous details, such as the director, studio, rating, genre, date of release, plot synopsis, runtime, number of discs, location, audio data and DVD extra info. More detailed information can be added when it comes to the cast, plot and disc details. You can use a search function when dealing with a large number of entries, generate reports (printer, PDF, HTML), export the collection as XML, repair images, as well as set DVDs as borrowed/returned. Furthermore, you can edit the filters and genre list, update Easter Eggs, create a wishlist, search for movies on Amazon, as well as make DVDAttache automatically retrieve the awards list for all new or updated movie titles, just to name a few. The program is very light on the system resources, has a good response time and works fine, without hanging, crashing or popping up error dialogs. We haven't come across any issues in our evaluation.
