I ran the following command: `qmake -project` Then, I edited the .pro file in the following way: `SOURCES += main.cpp \ foo.cpp` Then, I ran the following command: `make` This did not compile or work. When I check the Makefile, I see the following line in the autogenerated file: `FORMS += foo.ui foo.h foo.ui.h` But, if I look at the foo.cpp file, I see the line: `INCLUDEPATH += My::include`
