VCard VCF To CSV Converter Software Crack With License Key

vCard VCF To CSV Converter Software is a straightforward piece of kit that, as the name suggests, enables you to create CSV files from VCF items. It comes packed with standard options that can be seamlessly set up by all types of users, regardless of experience. The installation procedure is quick and does not require special attention from the user. Its interface is represented by a regular window with an intuitive structure, where you can add VCF files to the list using either the file browser or drag-and-drop support. Unfortunately, batch processing is not supported in the unregistered version of the app. As far as settings are concerned, it is possible to filter content by names, addresses, email and phone numbers, choose the format type between regular CSV and Gmail compatibility mode, pick the separator between tab, semicolon, comma and comma-space, as well as create a separate CSV file for each VCF item, or just one CSV from all files. Last but not least, you can enable inclosed mode with double quotes, as well as remove CRLF (Carriage Return/Linefeed). The simple-to-use program does not put a strain on computer performance, as it runs on low CPU and RAM. It finishes a conversion job in reasonable time and did not hang, crash or pop up error dialogs in our testing. However, its limited options do not justify the pricing. Other apps offer the same functionality free of charge.
