The game does an excellent job at not only creating your own team but also allowing you to build your own stadium as well. You can build a basketball court as well, but I found that the game didn't know how long to take in order for the tiles to all be placed correctly. You can also sign free agents if you want to fill your roster with fictional stars. If you choose to do so, you have to be creative in advertising how you want to be paid. Each sports game tends to have its own unique set of needs for free agent contracts and options to be used during the season. This game gets a lot of respect from sports fans just for the fact that the teams are real. By real, I mean that the names, colors, logos, etc. look exactly like that of the real world teams. What makes it even better is that the developers were able to make a fantasy baseball card collection type of system by which you can trade cards to other players and decide how much they are worth based on their stats. I honestly do not know how long it took to get these cards off the way they are in the game. Other features include customizable injury and player management screens which is something that I have not seen in other sports titles. It is fairly straightforward and easy to use and offers an additional layer of realism in the games. Wolverine Studios has become a stalwart in the sports sims arena, consistently churning out solid sports simulations in multiple sports genres. They are back again, this time with Draft Day Sports: Pro Football 2020. This time around the studio is giving people a chance to take their favorite fictional pro football team to the top of the simulation mountain.

You can tell that a lot of effort and effort have gone into this game. The presentation, in general, is quite good. On top of a realistic presentation, a great roster update feature, and a great community features, DDS: Pro Football 2020 includes the option to add yet another sport. A soccer game that is based on the popularity of the sport around the world. Additional resources will help give a real feel for the international pro soccer leagues. It allows the user to get the feel of the teams. Based on various national leagues, DDS: Pro Football 2020 is able to show how the team performs based on league, nation, and uniform. While there is more than enough to get you started and lets face it it's kind of a staple of sports games, there is enough nitty-gritty details to really make the sim feel like it does in the real world. While I don't want to turn this into a review of the game, the one thing that I have found frustrating and a bit off putting is the contract status. I can see how rookie salaries are derived, but for the veteran players, the team must fill out the contracts in a half decent fashion.

As it stands now, the contracts are floating all over the place. What good is a contract if the player doesn't do much work to earn it? Thus, my review of the game. When you get to the game, you will see a very empty arena. The team is in the starting lineup. You are in charge of building a real team. This is important for a few reasons, the first of which is the lack of a real roster. Being realistic, DDS: Pro Football 2020 is going to require that you a roster full of players. You can add some, but most can't be "replaceable" without putting your team over the salary cap. The second is that the presentation, while very realistic, is somewhat dated. While the sim is not bad, the presentation of stadiums and arenas leaves something to be desired. The realist nature of the sim is great, but the lack of detail makes the game look very dry.
